

Guidelines for Installers – Net Metering Portal Usage

The Net Metering Portal provides an Installer Interface to facilitate the validation and technical completion of customer applications. Installers are requested to carefully follow the guidelines below while using the portal.

1. Purpose of the Installer Interface

The Installer Interface is intended for installers selected by customers during the application process. Through this interface, installers are required to:

- Validate/Invalidate the net metering application submitted by the customer.
- Complete the required technical details, including Inverter information PV system details
- Upload of mandatory documents
- Submit the completed application for further processing.

2. Applying on Behalf of a Customer

Installers may also submit a Net Metering Application on behalf of a customer through the main Net Metering Portal:

- Website: nmp.pitc.com.pk
- In such cases, the application is directly forwarded to the concerned Field Office.
- Installer-side validation is not required for applications submitted through this option

3. Documents for upload

- Please Refer to AEDB Schedule (III,IV) and create "Customer Agreement between Installer and Customer, pursuant to Schedule-3 (S# 2 & 5) of AEDB (Certification) Regulations, 2021.
- NEPRA Schedules are also available for Download. Please Download them, fill and attach with application.
- Please refer to **Message for Installers** section on nmp.pitc.com.pk main interface to download NEPRA/AEDB Related Documents.
